5 Enter MLS#

6 Confirm then Click OK

Type the file location in the white box and click **Add this photo**

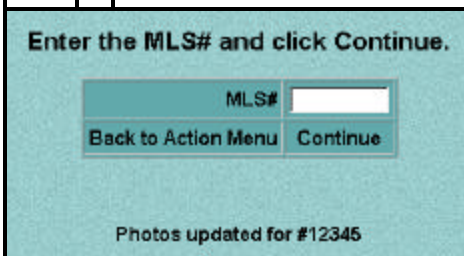

8 Type the photo description

Click **Save Changes** enter another mls# or **Return to Research**

10 Enter the MLS# and click Continue.

9 Click either Interior view or Exterior view

Details....

You must first create photos on your hard drive. Photos should use JPEG format and have ".jpg" file extension. They should approximate a 4x6 horizontal format and be no larger than 120kb.

www.zdnet.com/downloads/stories/info/0,,0000BC,,html

This site provides a *shareware* photo manager product that you can easily download.

Rearranging Photos...

Just click and drag them to a different position. (IE for Mac does not support this function.)

Descriptions...

Enter a description for each photo up to 80 characters in length.

Interior/Exterior...

Indicate whether the photo is interior or exterior view.

(In a future release of webREsearch, it will be possible for users to select exterior or interior views.)

Saving your changes...

Before leaving the Photo Management page, save your changes by clicking "Save Changes." If you decide not to save changes, click "Cancel."
