

## System requirements

To use Internet Explorer 5.1 for Mac OS 8.1 to 9.x, your computer must meet the following minimum requirements:

Processor: Macintosh PowerPC.

Operating system: Mac OS 8.1 to 9.x.

Memory: 16 MB of RAM. We also recommend that you turn on Virtual Memory by using the Memory control panel.

Hard disk: 12 MB of available hard disk space.

Programs: Apple QuickTime version 3.0 or later.

Modem: 9600 bits per second (BPS) modem (28.8 Kbps or higher recommended).

Network components: Open Transport 1.3 or later; for dial-up connections, Open Transport Point-to-Point Protocol (PPP) software or similar PPP connection software, including a control panel and an extension.

**Tip** If you're not sure whether your computer meets these requirements, click Apple System Profiler on the Apple menu. The System Profile tab displays information about your computer. To use all of the features available in Internet Explorer, we recommend that you also have access to the Internet through either an Internet service provider (ISP) or a network. Internet access might require a fee to an ISP; local or long-distance telephone charges might also apply.

## How to get Internet Explorer

For Mac OS X

If you are using Mac OS X, you can install Internet Explorer 5.1 for Mac OS X from the Mac OS X CD-ROM. It is not available as a download from Mactopia.

For Mac OS 8.1 to 9.x

You can download - for free - the latest version of Internet Explorer right at Mactopia.  
<http://www.microsoft.com/mac/download/ie/ie51.asp>

The link on the Hawaii Information Service login page will take you to Mactopia. In the middle of the page click on the link that says "How to get Internet Explorer...". From this next page click on the link in the center labeled "Download Internet Explorer 5 for Mac". Start the download by clicking "English" in the Download Now Section.

## Installation instructions

Before you install this download:

- Quit any other programs that are running, including virus-protection programs, because they might interfere with installation.
- Make sure [Aladdin Systems StuffIt Expander](#)  version 5.5 or later is installed on your computer. If an earlier version of StuffIt Expander is installed on your computer, you might not be able to install this download.

To install this download:

1. Print this page if you want to use it as a reference when you are offline.
2. Make sure your computer meets the minimum system requirements for this download.
3. In the table above, click the language version and file format you want.
4. Follow the instructions on the screen to save the file to your hard disk.  
If you are using Internet Explorer, the Download Manager saves the file to the desktop

- unless you specified a different download folder in the Preferences dialog box (Download Options panel).
5. On your hard disk, double-click the file that you downloaded in step 4 to expand it. Depending on the Web browser that you are currently using, this step might be performed for you automatically.
  6. Double-click the Internet Explorer 5.1.smi file to start the setup program.
  7. On the desktop, double-click the Internet Explorer 5.1 file.
  8. Drag the Internet Explorer 5.1 folder from the Internet Explorer 5.1 window to a location on your hard disk.

To remove this download:

Internet Explorer 5.1 for Mac OS 8.1 to 9.x does not include an uninstall feature.

## Additional information

For information about using Internet Explorer 5.1 for Mac OS 8.1 to 9.x, after you install it, see Internet Explorer Help.
