

*Below are links to web pages that contain basic steps for resizing photos with various photo processing programs.*

*Remember . . .* You add photos to the REsearch™ database by first creating the photos on your hard drive and then uploading them. Photos for **REsearch**™ should use the JPEG format and have a “.jpg” file extension. Photos need to be roughly the shape of a horizontal 4X6 print in “*landscape*” format and no larger than **120 kb** in size.

Paint Shop Pro (Recommended program)
